The added value of eCMR.services

Dear producer, innovator and hard worker!
A new obligation is coming: the eCMR.
It is a new way of doing business with the waybill.

As you know, most transport of products requires a CMR.
For the time being, this transport document is mostly taken into the car on paper. From 2026, it will be mandatory in the European Union to do the CMR electronically, i.e. paperless, according to a so-called eCMR.

With an eCMR, the entire process, as the name suggests, is done electronically. Before you get annoyed about yet again a new obligation: there are great advantages using an eCMR.

------ **Therefore choose eCMR.services** -----

eCMR.services makes it easier

Every party involved in a CMR (sender, transporter, recipient) can sign the CMR electronically.
Papers, pens or stamps are no longer necessary.
The CMR is stored electronically and can be made available through the internet to all relevant parties, including the driver.
At eCMR.services you are able to link additional documents to your CMR that you consider of added value for transporting your goods.

eCMR.services saves

Except for paper costs, you save a lot of time and costs on your administration.
The CMR no longer has to be passed from hand to hand. You can give everyone within your organization (partial) access.
The CMR will never be lost or be difficult to read.
At eCMR.services, the CMRs are stored in the Cloud for up to 10 years.
This way you create a clear and transparent environment for all your CMRs.

In addition, eCMR.services uses the highest security for the storage of your data, with the most modern technology and software, plus the best quality hardware.

eCMR.services accelerates
The CMR process is accelerated enormously.
With the help of eCMR.services you will know more quickly that your shipment has been completed. This way you are able to close the accounting process faster.
If there have been problems with your transport, this can be made visible, because all parties involved are able to link photos to the CMR.
If you use a WMS system or other software system, eCMR.services is able to import the shipping orders automatically, so you do not have to enter them manually. Different file exchanges are possible.

eCMR.services clarifies
More and more transport is being carried across the border and more and more companies are working with people who have different language backgrounds. Possible language problems have been resolved at eCMR.services. A user of eCMR.services sees the CMR in the language he is familiar with.
This applies to every user: administration, planner, warehouse employee, transporter, driver, financial employee, the customs office or the recipient abroad. English is always displayed as second language.
Everything in eCMR.services is available in 29 languages, the most commonly used languages in Europe.
Your CMR will be more beautiful and clearer, also because you can add your customers' logos to it. Logo's can be added to your addresses. Previously saved addresses, including logos, can be added automatically to your CMR.
By using eCMR.services you will make a much more professional impression.
And as backup, a paper CMR in PDF format is always possible.

eCMR.services offers extras
There are many more options, too many to mention.
It's best to go and see it for yourself.
Go to https://ecmr.services and click on the button at the top right: Register
